Subject: Verification of Jet A Fuel Sales Info & PRR of 2015 LL100 fuel sales broke down.

Public Records Request. Verification of Jet A Fuel Sales Info below, which I am pretty sure is correct. AND Public Records Request of 2015 through current date / LL100 fuel sales / Broke down into; Purchase Date. Gallons purchased. Actual cost of gallons purchased. AND COST of each delivery.

The total Jet A sales for 2013 was 1,667 gallons. The same seasonal pattern as 2014 showed up. Only 313 gallons of Jet A were sold from January 1, 2013 to June 30, 2013. Boline's N369AV helicopter accounted for 176 gallons of the 313;

In the second half of 2013, 1,354 gallons of JET A was sold which is a little less than 100 gallons MORE than the last six months of 2014;

JET A sales are made during the late Fall and winter months but they are relatively low.
